

# Save the date!

## 28 & 29 September 2015

### Global Pharmacy Technicians Symposium

Next year the International Pharmaceutical Federation (FIP) congress in Düsseldorf will host the 4th global Pharmacy Technicians Symposium

More than 3,000 pharmacists and pharmacy technicians will gather from over 100 different countries.

Pharmacy technicians are important members of the pharmacy team, fulfilling many new as well as traditional roles. Working with pharmacists, they facilitate increased access to an expanded scope of pharmacy services. This collaboration can be compared to that of a pilot and co-pilot.

#### Join us in Düsseldorf to:

- define and develop future roles for pharmacy technicians
- identify the competencies of technicians and how they will grow
- discuss education to make practice even better
- participate in small workshops and be inspired by case studies from all over the world
- start a new network of colleagues and friends
- set the agenda for your profession

*See you at the symposium!*
